about

3D designer working across precision modeling in Rhino, parametric design in Grasshopper, and hands-on fabrication. Designed and built a 9 × 6 ft parametric installation and created the FANUC robot animation on ACRO Automation Systems' homepage. Native Korean, fluent English.

skills

3D & CAD

Rhino 3D, Grasshopper, Fusion 360, Vectorworks (Spotlight)

Documentation

Isometric drawings, dimensioning (Fusion 360), STEP/STL prep for fabrication

Rendering & Animation

KeyShot, Autodesk Maya

Fabrication

3D printing (Bambu X1C, PLA-CF), laser and vinyl cutting, woodworking, lathe turning, metalwork (steel cutting, welding, grinding, finishing)

Graphic

Adobe Illustrator, Photoshop, InDesign, After Effects, Premiere Pro

Languages

Korean (native), English (fluent)

education

2026

University of Wisconsin-Milwaukee

Bachelor of Fine Arts, Design and Visual Communication

Undergraduate Certificate, Digital Fabrication and Design

projects

Out of Plane

Installation, UW-Milwaukee

Parametric design & fabrication

Designed a 9 × 6 ft Voronoi frame in Grasshopper, randomizing node heights to give the surface three-dimensional relief. Moved from a CNC plywood concept to 3D-printed PLA-CF joints, black walnut dowels, and metal wire, then built and exhibited it at full scale.

LAMY Safari

Personal study

Reverse engineering & precision CAD modeling

Disassembled a five-part fountain pen and measured each component to 0.01 mm with a digital caliper. Rebuilt every part in Rhino so it seats and assembles like the original, then rendered the assembly in KeyShot.

Booth & Stage Studies

Practice demos

Exhibit & stage modeling in Vectorworks Spotlight

Modeled a 10 × 20 ft booth from a practice brief, a lemonade booth, and a concert stage recreation.

experience

Soban Korean Eatery

Oct 2025 - Dec 2025

Brand & Visual Designer (Freelance)

Milwaukee, WI

Redesigned the menu board system for both locations in one week as sole designer, replacing a playful look with a minimalist, high-legibility system. Turned the owner and CFO's reference direction into updated brand guidelines.

ACRO Automation Systems, Inc.

May 2024 - Sep 2024

3D Designer & Animator (Freelance)

Milwaukee, WI

Modeled a FANUC robotic system in Rhino from technical drawings. Hand-keyed the animation in Maya; it runs as the hero visual on the acro.com homepage. Refined the motion over 5 months with the executive team, keeping it true to the real machine while reading clearly on screen.

Republic of Korea Marine Corps

Aug 2022 - Sep 2022

Interpreter

Served as sole interpreter between ROK and U.S. Marine Corps units, translating classified operational and intelligence materials.
